REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The applicants have amended the claims. The amendment has overcome the rejections made in the previous Office action under 35 USC 112. Claims 22-27 and 29-40 requiring the energy to comprise a frequency and a wavelength is interpreted according to the applicants Remarks as reciting the inherent characteristics of the vibrational energy. US Patents 5,339,845 and 6,616,771 are made of the record to show the state of the prior art with respect to cleaning of internal channels in the articles. However, neither these references, nor the other cited prior art teach or suggest a method and apparatus as claimed. US Patent 6,663,718 is considered to be the closest prior art. This document teaches a method and apparatus for cleaning internal surfaces of an article by flowing a cleaning liquid and applying vibrational energy. However, the document teaches transmitter of the vibrational energy in the article, not in the reservoir. Moreover, the document teaches connecting of the article not through of an interface of the reservoir, but through a system comprising pumps, filters and solenoids.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 571-272-1304. The examiner can normally be reached on Monday-Friday.
